

Program Information

This one-day workshop will demonstrate to parks and tree professionals proper tree pruning, from new tree training to mature tree maintenance to create a strong enduring structure, maintain vigor and achieve specific municipal objectives.

Instructors

Nathan Schuettelpelz and **Ryan Rodefer** began their arboricultural careers with Wachtel Tree Science, Inc. in 2010 after earning their Bachelor of Science Degrees in Urban Forestry from UW-Stevens Point. Ryan and Nathan have provided hands-on training and taught Wisconsin Arborists about ISA Arborist Certification and safe tree support systems installation.

Ryan was a driving force in adopting rapidly evolving tree climbing systems and integrating those systems into Wachtel's safety oriented culture. He has ISA CTSP certification and leads Wachtel Tree Science's Safety Program. Ryan has earned multiple awards from the Tree Care Industry Association.

Nathan's focus on the science within urban forestry management has him providing assistance with public tree inventories, forestry management plans, and implementation of Emerald Ash Borer management activities to communities across southern Wisconsin. Nathan manages the Consulting Department within Wachtel and oversees the work that is critical to urban forestry management within the State.

Who Should Attend

Community public works and parks employees, tree board members, managers, and others who have responsibility for or are involved in community tree pruning. Audience may also include groundskeepers, landscape contractors, tree & lawn care firms, and nursery retailers.
